

Subcl 1
1. (Amended) A golf ball having 360 dimples and only one great circle zone not intersecting with said dimples formed on a surface of said golf ball such that a surface area occupancy percentage of said dimples is 70% or more,

B1
wherein two or more rectangles each having a shorter side of 1.0mm and a longer side of 2.4mm and not containing any of said dimples can be formed in each of large flat portions formed in the range of 20 to 50 both inclusive in a region other than a region proximate to said great circle zone, without said rectangles separating from each other and with said rectangles overlapping each other in an area not more than a half of an entire area of each thereof.

2. (Amended) The golf ball according to claim 1, wherein rectangles each having a shorter side of 1.0mm and a longer side of 2.4mm are formed in the range of 40 to 100 both inclusive in said large flat portions formed in said region other than said region proximate to said great circle zone, without said rectangles separating from each other and with said rectangles overlapping each other in an area not more than a half of an entire area of each thereof.

Attached hereto is a marked-up version of the changes made to the application by this Amendment.
